AZURA

Contemporary Series

There's nothing quite like sitting back, relaxing while you watch the flickering flames of a log fire and the new Azura range of Gas Log Fires is no exception, providing that experience, but with the convenience of Gas. Ask for home inspection today and have one of our Experienced consultants advise you on which Azura gas log fire is best suited for your home.

Proven

The Illusion Azura Series of Gas Log Fires is based on the popular Illusion Luminar gas fire and features contemporary fascia styling to provide unique alternatives to the existing Luminar range. The Mantel Style is designed to make installation with a mantel a simple job with outstanding visual appeal.

Function

With a firebox designed to maximise the view of the fire, auto fan on/off function, fire on/off fingertip control conveniently located on the side of the fascia (or on the control panel on the Mantel version) and optional remote operation, the Illusion Azura Gas Log Fire puts the control in your hands.

AZURA - MANTEL FASCIA

Realism

Aesthetically pleasing, with logs moulded directly off Australian hardwood you won't find a more realistic gas log fire anywhere. Clean burning gas without the hard work!

Peace of Mind

Fully tested and approved to Australian Standards, you can rest assured the Luminar based Azura Gas Log Fires are built with the safety of you and your family a priority. All Azura Gas Log Fires are sealed units which draw combustion air for the fire from outside the building.

AZURA 2.0 CLASSIC FASCIA

The Illusion Azura range can be installed in suitably sized existing or new fireplaces, purpose built cavities, or even through existing walls. With 2 sizes there's bound to be the ideal solution for your home. Our showroom consultants can advise you which size is best suited to your requirements.

AZURA 1.0 CLASSIC FASCIA WITH STAINLESS STEEL TRIM

The Illusion Azura series features the most life like logs available, with a level of realism others only aspire to. Our stylish fascias frame an enormous ceramic glass viewing area with fascia options to suit existing fireplaces or through wall installations. Bring your plans in and let our friendly staff work with you to ensure the end result is all you expect and more!

REMOTE CONTROL OPTION

Illusion

Gas Log Fires

Installation

The Illusion Azura Series can be installed with either a rear mounted or top mounted flue system.

Balanced Flue

For your safety, the combustion air for the fire is drawn from our balanced flue system. Using natural convection by drawing air from outside the building, it provides flexible and comfortable warmth.

A non balanced flue requires constant ventilation to keep it burning and can make the room stuffy.

In contrast, a balanced flue gas fire is room-sealed using a glass front. It has a sophisticated flue that uses natural convection to draw the air from outside the building for combustion and expels it back to the outside through a separate compartment of the flue.

10 Year Warranty

The Illusion Azura Series of Gas Log Fires come with a **ten year** warranty on the firebox. All other components are warranted for 12 months from the date of purchase.

Australian Made

ILLusion Gas Log Fires are designed and made in Australia and utilise the finest available materials and processes to produce a uniquely Australian product. No other locally made gas log fire can compare to an ILLusion Gas Log Fire.

Illusion Australia Pty. Ltd. is a wholly Australian owned and operated Company. All ILLusion gas log fires are manufactured in Australia to exacting standards.
