MILLENNIUM SERIES

ULTIMATE MILLENNIUM 33

You can now enjoy the atmosphere of a crackling log fire at the push of a button. The Millenium collection is one of the worlds most advanced gas log fires, featuring our unique Pyroglow logs, which are free of ceramic and asbestos fibre, providing the most realistic flame and log appearance on the market today. The Millenium 33 can heat 8 to 10 squares utilising a 3 speed twin barrel fan, one of its major advantages is that it is ideal for any application and can be built into a plaster or MDF surround. The large panoramic bay window provides an unparalleled viewing area, whilst its high efficiency design leads to considerably lower running costs. The extra heavy duty 3mm thick firebox guarantees longer life while the simple and easy to use controls provide for many years of trouble free operation.
