MYSTIQUE 8000L	1435	715	740	435	80	1155	200	1355

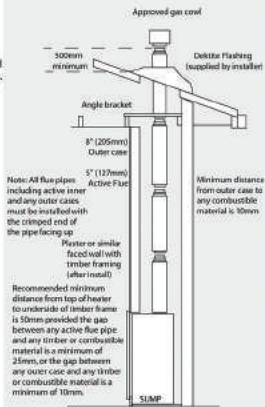

Minimum from floor 150mm

Illusion Mystique gas log fires have been designed for installation into a purpose built enclosure or an existing suitably large chimney. The diagram at left shows an example of an enclosure which would attach to an existing internal wall. The enclosure can be plastered or faced with a variety of materials including tiles or stone and other decorative masonry products, but the unit **MUST** be installed prior to the application of any facing material due to the unit's sump which sits lower than the fascia.

EXAMPLE INSTALLATION

Wall cut out size: NOTE: The Mystique 8000L must be installed in a purpose built cavity before plastering to allow the heaters sump to drop below the sillline fascia.

MODEL	HEIGHT (A1) MIN	DEPTH (C) MIN	WIDTH (B1) MIN
MYSTIQUE 8000L	690 mm	450 mm	1415 mm

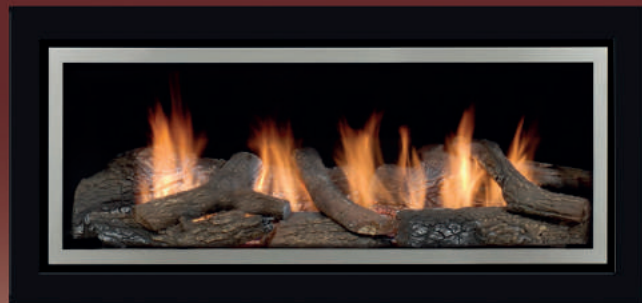

All Illusion gas log fires must be installed **ONLY** by an authorised gasfitter in accordance with the regulatory authorities.
