Minimum from floor 80mm

The Illusion Realistic gas log fires have been designed for simple installation through an existing wall (external or internal). They can also be installed into a purpose built enclosure or an existing suitable large chimney. The diagram at left shows an example of an enclosure which would attach to an existing internal wall. The enclosure can be plastered or faced with a variety of materials including tiles or stone and other decorative masonry products.

EXAMPLE INSTALLATION

Suggested wall cut out sizes. (suits standard fascia and larger)
IMPORTANT: Allow min 150mm up from floor when fitting standard window fascia and extra if skirting is fitted to the wall

MODEL	HEIGHT (A1) MIN	DEPTH (C1) MIN	WIDTH (B1) MIN
REALISTIC 5000L	780 mm	450 mm	1380 mm

All Illusion gas log fires must be installed **ONLY** by an authorised gasfitter in accordance with the regulatory authorities.

REALISTIC 5000 WALL MOUNT - BLACK WITH STAINLESS STEEL TRIM

THE CUTTING EDGE IN MODERN GAS LOG FIRES

Introducing the all new Realistic 5000 Gas Log Fire by Illusion. This ultra modern range of stainless steel gas log fires are an ideal addition to any surrounding, providing sharp modern looks accompanied by superior heat output and efficiency.

Available in either wallmount or models, the Illusion Realistic gas log fire can be tailored to suit any individual needs and will suit virtually any style of decor or interior, making selection of the ideal heater a breeze.

With a firebox designed to maximise visual appeal, auto fan function, hi-lo flame control and optional remote operation, the Illusion Realistic series of log fires puts the control in your hands!

Not only is the Illusion Realistic 5000 Series visually stunning, it contains logs moulded directly off Australian hardwood and you wont find a more realistic gas log fire anywhere. Each log is meticulously hand painted by craftsmen who take pride in their work and you'll be hard pressed to tell our logs from the real thing!
